

EUROMERE NEW PRODUCT! **FSP®-HV 1532**

EUROMERE is introducing FSP®-HV 1532 to enhance our industry offerings. This newly formulated Bonding Pastes boasts the following features:

- Improve ease of application (suitable for manual or pressure plate machine). Viscosity profile ensures application of high thickness film without sagging
- Lower density, utilizing a reduced quantity of higher quality extenders for improved adhesion to substrates
- Enhanced mechanical properties
- Exterior friendly white color for use in cosmetics and external applications
- Reduced linear shrinkage
- Lower styrene content compared to other formulations
- Gap filling capability of 8-12 mm
- Shorter cohesive bonding time than usual (3-4 hours)
- Catalyst revelator included

FSP-HV 1532 proves versatile and is well suited for various applications, including:

- ADHESION
- CORE BONDING
- ANTI-BUBBLE APPLICATIONS BEHIND GEL COAT
- GAP FILLING

► *FSP-HV 1532 is available in both summer and winter versions.*

We kindly request you to contact your nearest Euromere Products distributor for further information, Technical Data Sheets and MSDS sheet and sample requests.
